Jülich, 28. Aug. 2026

Dear Prof. Rongliang QIU,

I hereby extend my invitation to Prof. Rongliang QIU (**born on 11-11-1967, Passport Number: PE2086821**) to visit Bonn University and the Institute of Bio- and Geosciences 3: Agrosphere of Juelich Research Centre (IBG-3, Forschungszentrum Jülich) from October 23th to 27th, 2026. We could have a project-summary international workshop based on “Environmental behavior of heavy metals and soil nanoparticles in soil: Characteristics, formation, and co-transport (*Sino-German Mobility Programme, M-0749*)”. I believe this is a great opportunity for us to discuss more potential further international collaborations for our future work.

As agreed by both of us, the costs of your flight tickets and local accommodation (living and meals) will be covered by the Mobility Programme (project No. M-0749) of Germany. Additional costs for health insurance, visa application, local transportation, and other research activities in Europe will be covered by your university. I look forward to meeting you in Juelich.

Please let me know if you need any clarification or additional information regarding the above invitation. I am very much looking forward to meeting you in Germany soon.

Sincerely,

Prof. Dr. Roland Bol
